Product Stewardship

In the tenure of the association with St-Art India foundation for the last six years, we have worked on various street art projects across the country with a mutual hope to make art more accessible to the public. Our aim is to add colour and create a vibrant and happy environment in India. We support the foundation and the artists and are extremely proud to be associated with this initiative. We believe this will bring a change and transform the cityscape drastically through art.

Encasing numerous species and habitats into a human heart chamber, this mural highlights the connection between the health of our lives and the lives of our ecosystem.

Artwork by Svabhu Kohli. Location - Goa.
